 - VR FRONT AXLE HALF, RIGHT

Shape, construction, performance and technology... German cars are among the best in the world, and for good reason. The combination of a combustion engine and an electric motor ensures excellent driving characteristics and low fuel consumption. The leather upholstery emphasizes the luxurious appearance of this car. Going out in winter can be quite a challenge. That is why this Mercedes-Benz E-class is equipped with pleasant heated front seats. The driver and co-driver sit stable in the sharp bends thanks to the sports seats. The rich equipment also includes a sliding and tilting roof, 18-inch alloy wheels, LED headlights, sports suspension and half-leather upholstery.

The four cameras that make up the 360-degree camera give you the ability to see obstacles in any direction. In addition to manual control, you can control important functions with your voice thanks to the built-in voice control. You always know where you need to be, thanks to the navigation system with hard drive. The standard equipment of this car also includes automatic air conditioning. No parking space is too small thanks to the assistance of the parking sensors. Of course, a multifunctional leather steering wheel, rain sensor, cruise control, automatically dimming interior and exterior mirrors and central door locking with remote control are also part of the equipment of this complete car.

As you would expect from this Mercedes-Benz E-class, it is equipped with a range of active safety systems. The safety systems of this car also include traffic sign detection. It reads along with you while driving and draws your attention to the significant traffic signs along and above the road. The last thing you want is to doze off behind the wheel. To prevent this, this car is equipped with fatigue detection. A safe extra is the Brake Assist. Research shows that drivers do not get the most out of their braking power during an emergency stop. With this automatic braking support,.
