

# Steady Staafwielklem SCM aluminium velg aanhanger of caravan (40 EUR)

Locatie **Zuid-Holland, Waddinxveen**  
<https://www.advertentiax.nl/x-1936737-z>

De compacte Steady staafwielklem is heel eenvoudig aan te brengen. U haakt de wielklem achter de chassisbalk van de caravan, aanhanger en/of trailer, schuift vervolgens het slothuis over de klemstang en drukt het slot in.

De zeer sterke en solide Steady staafwielklem is heel eenvoudig aan te brengen en, na de eenmalige afstelling, met een vingerdruk op slot te zetten.

De wielklemmen zijn zo ontwikkeld dat ze geen beschadiging aan uw velgen veroorzaken.

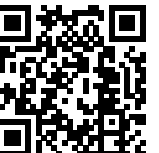

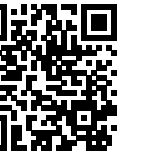

Eigenschappen - Steady staafwielklem SCM  
 De doorsnee van de staaf is 19 mm.

De wielklem past niet als er een trommelschijf achter de stalen velg zit!

Verkrijgbaar in 2 uitvoeringen:

stalen velg  
 aluminium velg

Dit is de aluminium velg uitvoering!

|                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                    |
