

Apple Thunderbolt Display (27-inch) (250 EUR)

Locatie **Noord-Holland, Amsterdam**
<https://www.advertentieX.nl/x-1951214-z>

For sale is this used, yet near-perfect display, model A1407. Selling to save space in a smaller apartment. We are sad to see it go (and we are keeping its twin.)

You will love the built-in camera, microphone, Gb Ethernet for solid Internet, (which goes through Thunderbolt), powered (!) USB ports. And above all, crystal clear video.

Purchased in the United States, it works on both US and EU power. (It comes with a plug adapter.) It has a Y shaped cable with Thunderbolt for video and MagSafe for power. – an adapter is included for older MagSafe Macs.

Please note that the display port is frayed. Even so, it works – see images. It works on the original MacBook Air as well as the M-series MacBooks. support.apple.com/en-us
