Buy your LTD Connelly Outlaw Waterski now @ Buyski Europe, Your Online Pro Waterski Store

We were the first to design wide shaped skis because we know you don't need to be a high-end buoy chaser to enjoy waterskiing. A wide tip and tail contributes to less effort getting up and out of the water. A narrow design under the bindings and a high-end construction keep the ski responsive, lively, and fun.

Ski Width

Narrow skis ride deeper in the water, offering more contact and control. This makes edge transitions faster and requires less leverage to achieve low angles, quick turns and explosive speed. Wide skis are necessary at slower speeds to keep the ski on top of the water and provide a stable and predictable ride. To maximize performance and control, we use the same basic features as our top end skis and tune them for less speed.

Ski Flex

Flexibility is a critical factor to find the perfect platform for your style of skiing. By utilizing different orientations, types, and amounts of carbon and fiberglass we can fine tune the flex of each ski to perfectly suit the intended use. Our high-performance skis use carbon to provide precision and explosive acceleration. If you're looking to just get out on the water and have a good time, our recreational skis contain fiberglass for a forgiving and less demanding ride.
