MacBook Pro with a broken screen

Repairing is extremely expensive (875 euro at Apple)

It can, however, serve as a MUCH BETTER substitute for Mac Mini:

- More powerful processor (M1 Pro vs M1)
- Built in keyboard
- Built in trackpad
- Built in web camera
- SDXC port (although Mac Mini has an Ethernet instead)
- Portable, and doesn't need constant power supply

So you get a lot more powerful device, with a possibility to repair the screen in future

Used Mac Mini with 16gb of RAM, 512gb of SSD and M1 (not Pro!) will cost you around 700-800

Personally, I need portability for my work, otherwise, I'd buy a desktop initially

Feel free to write any
