I'm selling a wonderful 2009 z750, mechanically maintained very well. Used for weekend rides and trips. I'm selling due to an upgrade to a 600/750 or even 1000 supersports bike.

Unfortunately, due to two slips on the track at low speed, the bodywork has some scratches which however do not compromise the use of the motorbike.

It mounts various parts: G&G moto2 with E-mark exhaust, quickshifter, LED indicators, GIVI shield, set factory low-bend handlebar, comfort saddles, braided hoses.

The clutch, accelerator cable, throttle body cleaned with ultrasound, front brake discs, transmission and engine head gasket were completely replaced. Valve check at 39,000.

Estimate -10% less KMs because it has a 14 pinion (better acceleration however adds more km).

Double keys and complete manuals. I have the original exhaust.

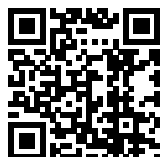

The motorbike was purchased in Italy and taken with me on a trip to the Netherlands (with Dutch licence plate) when I moved here.

You just have to put gas in it and have fun!
