Hi, I offer here my Gaming/Rendering PC, it was assembled about 6 or 7 months ago by me personally and I find myself selling it as I need to make a much smaller and portable ITX build like my Mac Pro 2013. Everything about the PC is present, from the boxes of every component to the manuals for them, and it will all come with the sale.

Needless to say it is a great companion for Gaming, far too much so in many cases, it definitely needs to be placed with quality peripherals such as high refresh rate 2K/4K monitors and the custom Liquid Cooling allows it to have excellent temperatures. For example, the RTX 3080, despite featuring the NVIDIA Ampere architecture (known for its excessive power consumption) does not even touch 55 degrees at full operational load (considering 350W consumption and NVIDIA AI-based overclocking). Next I leave the technical specifications in detail for each individual PCB inside the case:

CPU : i9-14900K (24 Cores - 32 Threads - 6 GHz) (Liquid Cooled)

GPU : RTX 3080 Founders Edition 10GB GDDR6 (Liquid Cooled)

RAM : 64GB DDR5 5600Mhz (QVL listed and XMP Profile 3.0 Active) Corsair Dominator Platinum RGB

CASE : H9 Flow White (NZXT)

MOTHERBOARD : N7 Z790 White (NZXT)

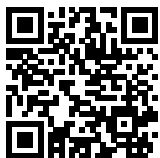

PSU : NZXT C1000 80 Plus Gold (FM)

STORAGE : 2TB Samsung 980 Pro - 500GB Crucial P3 Plus - 256GB Samsung 970 EVO - 256GB

kingston a4 (SATA SSD) = 3TB Complex.

Custom Liquid Cooling (Rigid Tubes) : Corsair Hydro

Just to say, the PC will be shipped in a box, it is not a do-it-yourself kit, which is why I made it. I have collected it so considering the work behind building a PC with a custom liquid system, I am not negotiating. If you are interested, please contact me in the comments and we will discuss it further.
