voor een extra accu.

De Nemerix Chipset kan 16 satellieten parallel ontvangen voor een nauwkeurige positiebepaling, andere GPS-ontvangers gebruiken slechts 12 satellieten. Doordat de Nemerix Chipset NMEA compatibel is werkt deze voortreffelijk met TomTom Navigator, Mapsonic, Route 66 en vrijwel alle andere GPS Software. De Nemerix-chip zorgt tevens voor een zeer snelle.

|                                                                                                                                                                                                                              |                                                                                                                                                                                                                               |                                                                                                                                                                                                                               |                                                                                                                                                                                                                               |                                                                                                                                                                                                                                |                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                 |
