DUOTONE SELECT 135x40 CM

Board is in perfecte staat en wordt geleverd met straps, vinnen en handle.

Dit is echt een fantastisch board met goede freeride eigenschappen. Vaart heel makkelijk up wind en is een heerlijk allround board.

In de specificaties zie je dat het board ideaal is voor mensen tussen 70 en 85 KG. Zelf ben ik lichter en heb fantastisch op het board kunnen varen.

De voet pads zijn DUOTONE VARIO.
 goed te verstellen en heerlijk zacht

Mocht je interesse hebben app of mail even.
 Ik woon in Scheveningen en je kan altijd even langskomen om het boardje te bekijken.

The Select is very easy to manoeuvre and the transfer from rail-to-rail carving in and out of turns is very steady and smooth, making this board a lot of fun out carving in the waves.
 The smoothness of the Select and speed you can hold combined with the pop this board delivers make it a fantastic choice for nailing your first hooked moves all the way through to boosting some epic board off's. The Selects grab rails are brilliant allowing you to take the board off using various areas with ease.
 Overall

The Select is an incredibly refined all-round twin tip, boasting the perfect blend of ease of use, comfort and performance. It comes with a Duotone pop-up in quality which is a top notch board that is built to last. The session and the Select is suitable for most of our levels. It is a great board for the beginner who live for board off's and the experienced mover.

The Select is quick to pick up speed and flies upwind with ease. There is plenty of grip from the 50mm fins and channels in the tips. One of the key points I noticed early on in testing the Select was how soft it felt under foot. The board soaks up every bit of chop, dodgy landings and handles high speeds with ease. You can really feel the flex in the tips of this board, either when playing around carving or powering into the takeoffs of your moves. The tips of the board give that final bit of grip and spring off the water we desire so much for an explosive take.
