Selling my laptop due to health issues that prevent me from fully enjoying it.

Specifications:

Model: MSI Gaming Raider GE76 12UGS-018NL
Processor: Intel® Core™ i7-12700H
Display: 17.3" Quad HD (2560 x 1440 Pixels)
Memory: 32 GB DDR5-SDRAM
Storage: 1 TB SSD
Graphics: Intel Iris Xe Graphics and NVIDIA GeForce RTX 3070 Ti
Color: Blue, Titanium

It is a loud and powerful machine, with the 3070 Ti performing similarly to the 4070. This is a really good laptop if you don't mind the noise and prioritize performance when looking for a gaming laptop.

I will also give these freely with it:

IETS 500 cooler
DualSense controller (the controller has mild stick drift, but the warranty is still valid, so you can get it replaced. I couldn't do it myself because I am sick.)
Honeywell PTM 7950 thermal paste and a high-quality thermal putty (optional for the best performance: I

was able to apply the putty to the GPU and CPU, but I didn't have time to do it properly. I also have a DualSense controller, but it has a mild stick drift, so I can't use it for competitive play. I'm selling as you can see by the home video. I'm giving it away for about 20 euros, but I had a good one, so never mind, use it
