PSU: Hiper 880W Bronze+ (This a no name power supply but reliable, was running my RTX3090 without

a sweat) - 30 euros

The GPU is in Ram is soldered into the mobo and already has cooler installed. The CPU and motherboard have the box. I can throw in a cable for the PSU. I can throw in original bios

You just need a graphic card, cooler and a case to make it complete. (I have an old AMD R9 and a never used Noctua NH-D15 laying around)
