About the Focal IC 690by Crutchfield's John Pollard

Audiophile-grade engineeringFocal applies the same technology they use in their home audiophile-grade systems to their Integration line of car speakers. Their Integration IC 690 6"x9" speakers feature cones made from Polyglass, a material that combines the warm sound of cellulose with the strength of glass, so they play accurately with no added resonances.

These Integration speakers offer excellent sound quality, while fitting in more vehicles.

Adjustable tweeterThe Integration processed-aluminum inverted dome tweeter features a built-in phase plug and wave guide, which act together to improve the dispersion of the high frequencies for a more effective stereo soundstage. You can also tilt the tweeter for better imaging in many vehicles. Integration speakers allow you to put Focal sound quality and construction into your vehicle without a lot of muss and fuss, so you can enjoy a dramatic jump in performance over your old speakers.

In zeer goede staat, alleen tijdelijk in camper gebruikt. Focal speakers in Caliber behuizing..Nieuwprijs ca € 150,-- per.
