I'm selling my old gaming desktop because I'm moving. A bit dusty but works as expected and is relatively small thanks to the compact case. Performance is still good enough to play modern games thanks to the 1080Ti being one of the best GPUs released considering its performance to age ratio.

Specs:

GPU - NVIDIA GTX 1080Ti

CPU/cooler - i7 6800k / Corsair Hydro Series H55

RAM - 32GB Corsair Vengeance DDR4

PSU - Corsair RM750X

Motherboard - MSI X99A GAMING PRO CARBON

Case - Corsair Carbide Quiet 400Q

I also have 2 Samsung 27" curved monitors (C27F396FHU), €50 each (one of them is missing a screw to mount it securely to the stand but can still be mounted relatively).
