Pelco VXP-P2-48-6-D RAID 6 Network Video Recorder 48TB, deze server is gloednieuw maar we hebben wel de doos geopend ter controle van de inhoud. Dit product kan alleen na bestelling worden opgehaald dmv een telefonische afspraak (Tel:06-51954748). Voor vragen kunt u ook altijd bellen of mailen. Het gewicht is rond de 30/35 kilo.

Pelco VXP-P2-48-6-D VideoXpert Professional v3.8 VMS Server with 48TB Storage and RAID 6

VideoXpert is a video management system (VMS) in a single box, designed for easy setup and robust monitoring in small or moderately sized applications. Designed for Windows platforms, VideoXpert is easy to install, quick to setup, and provides an intuitive interface that helps operators use video captured by the system.

VideoXpert is available in tailor-made hardware solutions or in software distributions to support your

existing VMS infrastructure. VideoXpert provides options to support the throughput you need, and can be configured to support RAID 6, RAID 10, JBOD, or other configurations for redundancy, performance, and fault tolerance. Software licenses operate on a per-channel basis, so you don't have to pay for more licenses than you need. The system can be configured to support a wide range of video formats, easy to integrate with your network storage.

Each camera/encoder on a VideoXpert system requires a channel license. To enable upgrades, VideoXpert software, an active software upgrade plan (SUP) is also required.

Key Features:
 Range: Power 2
 Raw Capacity: 48 TB

More about VideoXpert Professional v3.8 Scalable Video Management and Surveillance System
Server models also include Dell's iDRAC (integrated Dell Remote Access Controller) platform and support for Dell's OpenManage tools, allowing administrators to remotely configure and support VxPro servers, reducing the need for physical access to the server. Using the iDRAC controller, you can monitor hardware and receive email alerts via SNMP.

VxPro includes VxToolbox, an easy-to-use Windows application enabling users to quickly and easily configure an entire network of servers and cameras locally or remotely. VxPro has pre-defined roles, designed around standard surveillance operations, making user creation and assignments quick and easy.

The included VxOpsCenter client software provides an easy to use interface, so you can use VideoXpert with little to no training. You can operate VxOpsCenter clients in multi-system access mode, allowing one workstation to access multiple servers, scaling your surveillance solution. VxOpsCenter also supports modular plugins, providing integrated functionality from external systems, including informational overlays, license plate recognition (LPR), analytics (Pelco Basic, Enhanced, and Advanced Analytics Suites), and a built-in mapping application. Built around open standards, VideoXpert includes a complete application programming interface (API), software development kit (SDK), and dedicated technical support, allowing other systems' manufacturers to develop interfaces leveraging VideoXpert's capabilities. Administrators can migrate current Digital Sentry hardware environments to VideoXpert Professional, repurposing hardware and reusing current video management infrastructure while gaining the benefits of VideoXpert. VideoXpert Professional can also utilize Digital Sentry storage hardware as recording solutions, preserving the video stored on those devices while providing access to VideoXpert Professional features.

Features:

"VideoXpert in a box" functionality for small to mid-sized sites

Simple setup / IT-Friendly — designed for Unicast or multicast environments using Microsoft® Windows® for easy configuration and maintenance

Available in different hardware configurations to support the needs of different sites

Supports MJPEG, MPEG-4, H.264, and H.265

Supports monitor walls, including cell layouts and cameras

Up to 450 Mbps throughput per recorder

Supports attached storage (NAS) to extend video retention
Includes VxToolbox for simple configuration of one or more servers
Includes pre-defined roles for easy user creation, and also supports granular editing of user permissions
Motion Pixel Search for server side motion detection and quick retrieval of events

4k/H.264 and H.265 support for live and playback modes for cameras that support streaming through ONVIF, and the ability to export recorded segments

HTTPS support for Pelco and third-party cameras
Supports environments that use anti-virus and firewall software
Imports users and roles from existing LDAP servers to reduce administrative overhead, and enables single sign-on (SSO)
Check on VMS and camera health using SNMP (VxSNMP is available as a free, separate download)
Capable of listening for ASCII commands on a serial and Ethernet port simultaneously (ASCII Service is available as a free, separate download)

Includes Event Monitor Service feature, capable of polling for alarms from devices and performing specified actions when an alarm state change occurs (VideoXpert Event Monitor Service is available as a free, separate download)

Ability to expose video streams to third-party clients, with customizable RTSP endpoints that allow a client application connection to a VideoXpert System stream via the VxConnect service (VxConnect is available as a free separate download)

VxPortal web based client allows viewing and exporting video without installing any software
Check on VMS and camera health using SNMP (VxSNMP is available as a free, separate download)
Extensible through mapping and plugins, including video information overlays and license plate recognition

Supports aggregation through VideoXpert Enterprise system with aggregation

Supports ONVIF-compliant cameras and devices

Edge Storage Auto Gap Fill functionality detects when a gap in local camera recording occurs, and automatically downloads video and audio (if present) to fill the gap

Investigation mode enables operators to synchronize video playback and export investigative playlists covering scenes of interest

Monitor multiple VxPro sites with a single client

The desktop workstation supports up to two 4k monitors or four 1080p monitors

Supports Shared Display Decoders so operators can send video to surveillance personnel who need it most

Supports DNS hostnames for ONVIF-compliant cameras and Pelco cameras

Enables and supports Risk Management Framework (RMF) and FIPS 140-3

Provides seamless transition to VideoXpert™ Enterprise

Provides a migration path for Digital Sentry® systems

Server models support Dell iDRAC and OpenManage tools
