Wij verkopen onze server en betrouwbare krachtpatser omdat we op een ander systeem zijn overgegaan. De server is wat stoffig dus de nieuwe eigenaar doet er goed aan om hem eenmalig stofvrij te maken en eventueel op de processoren wat nieuwe heatpaste aan te brengen. Maar ook als je dat niet doet kun je hem meteen in gebruik nemen na het plaatsen van 1 of meerdere SSD's. De server komt zonder SSD's!

The IBM System x3550 M3 Type 4254 and 7944 server is a 1-U-high1 rack model server for high-volume network transaction processing. This high-performance, multi-core server is ideally suited for networking environments that require superior microprocessor performance, input/output (I/O) flexibility, and high manageability. Performance, ease of use, reliability, and expansion capabilities were key considerations in the design of the server. These design features make it possible for you to customize the system hardware to meet your needs today and provide flexible expansion capabilities for the future.
