I am selling my MacBook Air (13-inch, 2018, 128gb, Space Grey).

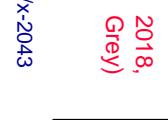

A few things to know:

- Mousepad, (butterfly) keyboard, TouchID, speakers, microphone, camera, USB-C and AUX outlets all work perfectly fine.
- Battery is used (it is the original one), but you can of course still use the Mac for some hours before charging it. It may need replacing in the future.
- The Mac works great! I am only switching laptops and selling this one because I need a higher processor to support the heavy programmes I will start using.
- As you can see, it is used (see last two pictures), it has some cracks at the bottom of the screen, but not on the screen itself. So, it does not affect the Retina screen in anyway. Also, I used to have stickers on it, so there are some traces from the stickers. Those do not come off but you can easily cover them with a case or a decorative layer (or leave it if you like it!).
- Comes with original charging cable and non-original charging plug.

Send me a message if you have any!
