I'm sadly selling my Mini Cooper R53s (163hp). APK and general maintenance just performed in July. Lovely and fun car, compact and handy. It has everything you can ask for a car of 2006. Beautiful interior with leader seats and steering wheel. Heated seats. Bluetooth system installed by me (car did not come with it). And the necessary cruise control and assistive parking rear sensors (beep beep). Wide sunroof (front and back) perfect for summer sunny days in the Netherlands (only the front roof can be open, by design).

163 original horsepower, nothing modified. Equipped with a supercharger (also original) which in combination with the John Cooper exhaust produces an amazing sound and driving experience. They say it's like driving a kart, it is true.

The car is in really good condition, both interior and exterior. Except for normal wear out of parts. The only remark is the rims, which are not original and are a bit scratched. I bought it already with these rims and they work fine.

Maybe interesting to know: you can fit your bike inside. My mountain bike fits by tilting the rear seats to the front.

That's all. Feel free to ask for more information if I missed something and feel free to ask me for a.
