

MSI Prestige PS341WU 5K2K designerx27s monitor DEFECT

Locatie

Zuid-Holland, The Hague

<https://www.advertentiex.nl/x-2054131-z>

The monitor was purchased at the beginning of 2021 in MediaMarkt and was paid 1200 euros.

Until the other day, it worked perfectly, but in the middle of the work, the picture started flickering and disappeared completely. The On/Off button works and the light is on.

I tried to change the cables and the screen is still black, but the lighting is visible in the background. I also opened the back cover to check the contacts but to no avail.

Due to the nature of the job, I have to buy a new one, so if someone knows how to fix it, or wants to take it to a service center, this is an ideal opportunity to get it at a low price Visually, the monitor looks like new, has no signs of use and is sold as defective in the original box.

The warranty has expired.

Specifications:

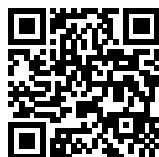

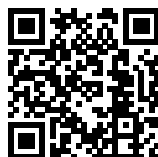

Type / Size: 34"ACTIVE DISPLAY AREA (MM): 798.648(H) x 335.664(V)CURVATURE: FlatPANEL
