YAMAHA R1 2007 (RN19) ON SALE

Yamaha R1 for sale in perfect appearance condition as seen in the pics, except for a scratch on the left side of the fairing and it works perfectly, not a single noise, it seems new.

The bike has a wide range of extras and maintenance, shown in garage invoices.

- Valves adjustment done at 47.000km.
- Engine oil (Motul 300v 10w40) new and oil filter has been fitted a week ago.
- New coolant with less than 1,000km.
- New brake fluid front and rear.
- New Brembo brake pads front and rear.
- Metal brake hoses on both brakes.
- Iridium spark plugs.
- K&N high flow air filter (noticeable in the performance of the bike at high revs).
- Akrapovic exhaust with twin tailpipes.
- New drivetrain (chain and sprockets) with one less tooth on the front sprocket, which makes the bike easier to ride at low revs (due to the long standard gearing) and more playful at high revs.
- Smoked screen.

In conclusion, I sell the bike for lack of use and with a lot of regret because it has probably been the bike that I will miss the most and joy. The feeling of riding a bike and the feeling of it being a bike, it is not easy to describe. I have been riding it for a long time and I have been feeling it in my hands and feet. I don't regret it.

The bike comes with the original eacapes, dbkillers, homologation certificate for the Akrapovic exhausts and even a vintage magazine.

Fixed.
