I have recently built myself an entirely new upgraded PC and am selling my old rig. This build is almost 4 years old and has run smoothly with no problems. This is a great offer if you are looking for a beginner entry into gaming PC's as not only do you get a great system capable of running all but the most graphically intensive games but also the monitor, mouse, keyboard and gaming headset to plug in and immediately starting downloading and playing.

The system with no accessories is €400  
 The system with accessories is €500  
 The system with accessories PLUS a second monitor (Gigabyte G27Q) is €600

Lastly I can do a clean install of Windows if you would prefer to update and tweak the drivers yourself.

The last photo is a list of the individual components inside the system.
