

Pagid geel RS19 race remblokken Porsche 911 GT3 RSR 997 (200 EUR)

Locatie **Noord-Holland, Amsterdam**
<https://www.advertentiax.nl/x-236640-z>

Aangeboden:

Pagid RS19 (Geel) raceremblokken (4 st.)
 Art.nr: U2488 (voorras)

Geschikt voor de voorras van de volgende modellen:

Porsche 911 GT3 RSR (type 997 , vanaf bj 2007)

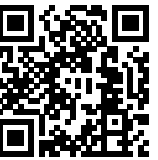

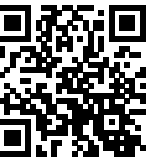

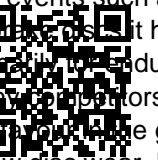

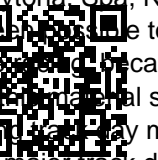

De blokken zijn ongebruikt.

Prijs 200,-

Verzending mogelijk

Pagid RS19 is a development from the bases of RS14, a reduction of the friction level has resulted in a very stable friction level and a major increase in pad and disc life. This material provides very good levels of performance and response at all temperature levels, only slight temperature inputs are required to bring the pad up to its optimum performance level. A true favourite with endurance racers having won many classes at all major endurance events, including GT class victories at the Le-Mans 24 hours race

from 1999 ? 2005, plus many victories at other blue ribbon events such as Daytona, Spa, Nurburgring, etc. The excellent life and low wear on the discs, it has been proven to run 20,000 km with a range of different discs. Although designed primarily for endurance racing because of its consistent levels of performance and low wear, many competitors use it for additional success in short distance races also. RS19 has also found favour with the ground race day market for the level of control, good cold performance, long life and low disc wear. Many major track day operator fleets have seen the benefit of using PAGID pads for corporate track days, while not being the cheapest brake pads on the market, we have proved that due to the longer life and less disc wear in comparison to other competitor's product, running costs can be reduced in comparison to cheaper, inferior products. Friction Level Cold 0.40 At 100°C 0.43 At 300°C 0.47 Max at (@ 550°C) 0.49 Constant working temperature 400 ? 700°C Max temperature for short period only: 550°C
