

# Apple Macbook Pro 15 Inch Late 2007 (a1226) (150 EUR)

Locatie **Noord-Brabant, Teteringen**  
<https://www.advertentiax.nl/x-262706-z>

Te koop: Macbook Pro 15 Inch 2007

(Wegens aanschaf van een nieuwe Macbook Pro)

De laptop is nog in prima staat. De body en het scherm hebben geen krassen.  
 De onderkant wat minimale gebruikerssporen. (met name op accu)

Accu is vorig jaar vervangen.

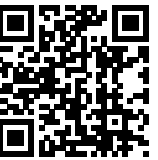

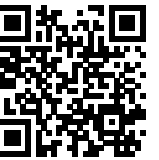

Op 1 of andere manier pakt ie sinds kort maar 1 slot van het RAM geheugen.  
 Ik ben zelf niet handig met Apple's, maar kan me voorstellen dat het gemakkelijk te verhelpen is voor iemand die er meer verstand van heeft.

De laptop wordt geleverd met de bijbehorende lader.

Wat specificaties:  
 Model: Macbook Pro 3.1 (A1226) Mac OS X versie 10.6.8 is geïnstalleerd. Processor: 2.2 Ghz Intel Core 2 Duo  
 Geheugen: 1 GB 667 MHz DDR2 SDRAM (omdat ie dus maar 1 slot pakt)  
 Externe poorten: o.a.: 2x 2.0 USB, DVI, Firewire Ports (800,400), Ethernet, Express Port,

Uiteraard werkend te zien/ te testen. Voor meer info of foto's graag even mailen.

Uiteraard bod mogelijk op de Macbook Pro 15 Inch voor!

|                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                 |
