SSG5 Secure Services Gateway is a purpose-built, high-performance fixed form-factor VPN security platform for small branch offices and standalone businesses that want to stop internal and external attacks, prevent unauthorized access, and achieve regulatory compliance.

It provides protection against worms, viruses, trojans, spam, and emerging malware using proven Unified Threat Management (UTM) security features backed by best-in-class partners. It features security zones, virtual routers, and VLANs that allow administrators to divide the network into distinct secure domains with unique policies.

SSG5 delivers 160 Mbps of stateful firewall traffic and 40 Mbps of IPsec VPN throughput for small branch, teleworker, and enterprise.
