The 3Com Gigabit Switch 8 is an affordable, unmanaged Layer 2, Gigabit switch. It is designed for small offices and remote branch offices requiring high network performance to exchange large data files and images, and access real-time information or connect to high-speed servers or a high-speed network backbone. The Gigabit Switch 8 features eight Gigabit ports. Traffic prioritization ensures real-time applications take priority so they run effectively and auto MDI/MDIX on every port, eliminates most common cabling problems. Compact form factor with connectors at rear, silent operation and compliant to interference levels standards, make this switch ideal for home and small office environments. This switch is operational straight out of the box with no configuration required. Furthermore, it is designed with the latest technology to operate with minimum power consumption.
