Kite only: 350,- euro

Bel of mail voor meer info

Ben ook regelmatig in westen van het land dus er kan ook daar afgesproken worden.

The Varial X, a new model for Airush, fuses the best design and performance features of the powerful and direct Varial kite with the unhooked, C-inspired performance of the former Vapor X. It's an impressive advanced-level kite that showcases high-end performance in big air, big power and precision control. The Varial X is powerful and fast-pulling, and pushes upwind with excellent drive. Steering is fast and direct, with smooth power generation through the turns; you can also transition with power through the down

loop. There is no flutter in the canopy through the loop, and the kite pivots well. Unhooked, the Varial X has a reliable, push-and-go and conversative power-to-weight ratio. Advanced-level riders will like the Varial X's fast, straight-tail recovery. With smooth and progressive feedback, that was apparent from last year's prototype. The kite's center of lift is very stable, and the kite is a pleasure to fly. The Varial X is a rider relative, so it can quickly learn to trim, build up lift and maneuver. It is a good, easy-to-control freestyle line. The high aspect ratio of the Varial X makes it a rider and beginner, and has a solid feel. The kite's low center of lift and the hard driving speed of the kite will let any advanced-level rider soar for good distances. Advanced-level riders can take the Varial X anywhere, and push the limits of every discipline with this solid freestyle

loop. There is no flutter in the canopy through the entire range, and it's extremely stable, especially, when lead by a bar. The Varial X has a very smooth, easy-to-control feel. The center bar is a great addition to the already great center bar system. The kite is very easy to fly, and the hard driving speed of the kite will let any level rider take the kite anywhere, and do it with confidence.	https://www.advertentieex.nl/x-3895

"I was never a fan of the Vapors... I just couldn't dial them in. But this new Varial X hits the mark for high-flying freestyle and aggressive riding in any conditionsone of my favourites of the group."

"The Varial X can boost bigger and is more aggressive than the Lithium, and much more versatile than

the old Vapors.;
