kite voor 500,- euro.
Kite only: 350,- euro

Bel of mail voor meer info
Ben ook regelmatig in westen van het land dus er kan ook daar afgesproken worden.

The Varial X, a new model for Airush, fuses the best design and performance features of the powerful and direct Varial kite with the unhooked, C-inspired performance of the former Vapor X. It's an impressive advanced-level kite that showcases high-end performance in big air, big power and precision control. The Varial X is powerful and fast-pulling, and pushes upwind with excellent drive. Steering is fast and direct, with smooth power generation through the turns; you can also transition with power through the down

loop. There is no flutter in the canopy through the loop, and the kite pivots well. Unhooked, the Varietal X can be remarkably, in its own right and compared to its massive potential advanced-level freestyle kite. The Varietal X has some fast-tangling power. With smooth, firm progress, the kite, that was released from last year's Varietal X, water relaunches with quick directness, but it's a little stiff and rough with a good, hard pull on the flying line. The other aspects of the Varietal X are the rider's ability to handle and handle the kite, and the hard driving speed of the kite will let any advanced-level rider soar for good distances. Advanced-level riders can take the Varietal X anywhere, and push the limits of every discipline with this solid freestyle

WHAT THE SBC TEST TEAM RIDERS ARE SAYING

"Great kid: boosts huge, great turning, eats gusts for breakfast, stable and well-behaved. Great range, as well."

"I was never a fan of the Vapors... I just couldn't dial them in. But this new Varial X hits the mark for high-flying freestyle and aggressive riding in any conditionsone of my favourites of the group."

"The Varial X can boost bigger and is more aggressive than the Lithium, and much more versatile than the old Vapors.;
