

Ficom Secons ODB diagnostic interface USB (300 EUR)

Locatie **Noord-Brabant, Tilburg**
<https://www.advertentieX.nl/x-421592-z>

FiCom ODB uitlees interface, origineel in originele verpakking.

FiCOM

FiCOM is diagnostic software for Fiat, Alfa and Lancia vehicles. It covers also other vehicles made in cooperation with Fiat such as Ford Ka II.

FiCOM comes with smart OBD2 to USB interface which contains multiplexer for both K-Line and CAN-BUS communication. This means that interface works fully automatic without need to hassle with jumpers, switches, or wires. Supported protocols include KW71, KWP2000, ISO15765 with extended IDs and extended addressing.

The software is very easy to use. We also tried to maintain compatibility with Fiat Examiner Smart, wiTECHplus and Iveco EASY/Eltrac where possible.

Key features

Support for wide range of ECUs and models (model selection and ECU selection screenshot))

Fully multiplexed all-in-one smart USB2.0 interface

Wide range of communication protocols and buses covered: KW71, IAW, KWP2000, FIAT9141, ISO15765, UDS, ...

Automatic ECU recognition

Vehicle selection (screenshot)

ECU selection (screenshot)

Real-time (OTC) reading (screenshot)

Free frame (screenshot)

Fault code clearing

Measured values / live data (first, second and third screenshot)

Live data recording

Diagnostic protocol printing

Actuator tests (screenshot)

Control unit coding: (screenshot)

Immobilizer key matching (PIN code reading from ECUs is under development, we have function)
