

# Shell Helix Professional AM-L (Mercedes) 1 Liter (7,70 EUR)

Locatie **Overijssel, Rheezeveen**  
<https://www.advertentiex.nl/x-429980-z>

Volledig synthetische motorolie die kan worden toegepast in diesel- en benzinemotoren van personenauto's.  
 Is met name geschikt voor de nieuwste technologie BMW dieselmotoren met roetfilter waarvoor een olie is voorgeschreven die goedgekeurd is als BMW Longlife-04 olie.

Shell Helix Ultra Professional AM-L 5W-30:

- Is ontwikkeld om te voldoen aan de hoge eisen die gesteld worden aan motoren waarvan de hoogste prestaties worden gevraagd, waaronder BMW en Mercedes-Benz, en motoren die API SN/CF of ACEA C3 vereisen
- Shell en Mercedes-Benz werken nauw samen en voeren onderzoeks- en ontwikkelingsprojecten op het gebied van smeermiddelen uit
- Slaagt voor een uitgebreide reeks prestatietests en voldoet hiermee aan de motoroliespecificatie MB 229.511

Specificaties:  
 API SN/CF;  
 ACEA A3/ B3/ B4/ C2/ C3,

MB goedkeuring 229.51  
 is geschikt voor BMW dieselmotoren met roetfilter en voor benzine motoren met roetfilter

|                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                |
