These flexible braided engine dipsticks are designed to coordinate with Lokar's flexible transmission dipsticks. Their slim design allows for an easy installation inside of your headers to work with OEM and Sanderson cast exhaust manifolds. They have clearance for black hugger headers or can be applied straight into the engine block (without tube), depending on your application needs. All engine dipsticks feature an L-Z read aluminum or steel sock (depending on your application) for an accurate measurement of engine oil. All Lokar products are made in the USA and carry a lifetime warranty. Phone toll free number
