SPS-M600W the Audiophile Experience on the Waves
 There is no substitute for a premium marine ready speaker in a wet environment!

Alpine's SPS-M600 16,5 cm 2-way coaxial speakers are specifically designed to add the ultimate listening pleasure to every maritime cruise. Designed for high power handling, these speakers are ready to embark on an expedition into great sound.

Equipped with PEI balanced dome tweeter and Poly/Mica Woofer Cone the SPS-M600 Type-S speakers deliver crisp highs and nicely balanced mid/bass performance. Their Centrex 813-coated grilles and high-strength, non-resonant, high-temperature ABS frames provide hardwearing durability and UV protection against yellowing. To offer a high quality frequency response and to ensure excellent resistance against moisture, oil, heat, and chemicals the SPS-M600 are Santoprene surrounded. All Alpine Marine Speakers offer excellent protection from outdoor environment conditions.

Silver or White?

Two available colours silver and white enable to aesthetically integrate the speakers into a traditional white cruiser or sailing boat as well as into a modern stylish yacht or sportboat.

Built strong for long durability

These speakers are built to last due to their durable construction using the latest marine-rated materials.

Go Open Air

Both the subwoofer and coaxial speakers are engineered to work optimally in an infinite baffle configuration, so best sound performance can be achieved, without the need for an enclosure.

Marine Ready

Ready for the big splash: Due to their ATSM proven Salt/Fog and UV Marine specification and their NEMA rated water resistance on level 5 all Alpine Marine Speakers exceedingly resist the challenges of the marine environment.

Choice of Two Models

For maximum installation flexibility in any boat Alpine's 2-Way Coaxial Marine Speakers are available in two sizes: the 16,5 cm direct factory replacement SPS-M600 and the 17,8 cm sound upgrade SPR-M700.

Perfect Amp-Speaker Matching

All Marine Speakers are engineered to work with the PDX Marine Amplifiers for highest system building capability. To ensure the best possible sound quality, their audio characteristics match perfectly.

Designed for Clean Installation with Maximum Water Resistance

Hidden-screw grille design and supplied waterproof rubber mounting gasket allow for clean and leak-free installation. All parts including the speaker connections are saltwater corrosion resistant. SPS-M600 is also equipped with magnetic shielding to avoid interference from other marine electronic devices, which allows its installation anywhere on the boat.

Tweeters in Special Marine-Design

The SPR-M700's titanium dome and the SPS-M600's PEI balanced tweeters are designed for maximum high range sound projection in the open marine environment.

For optimum sound focus the SPR-M700 tweeter also swivels. Built-in protection keeps them playing volume stable. Both tweeters are fully saltwater corrosion resistant.

High-Strength Frames

All models have high-strength polypropylene frames resisting UV-light and corrosion while keeping the motor structure aligned for maximum output. Moreover they are tough enough to handle higher levels of vibration on the boat.
