The Pilgrim 125cc Series is based on a Yamaha SR125 model, running on a fairly simple single cylinder, four-stroke air-cooled engine known mainly for it's legendary predecessor - the cult SR500. SR stands for Single Road and - with it's limited capacity - generates sufficient amount of 18 HP, which make the bike ideal for riders in need of a small city-bike, a fair-weather second mean of transport on short, dynamic distances. What makes our SRs exceptional is bodywork, with a shortened frame (maintaining it's original double-rider capacity). It comes with a custom seat, smart battery-box, two types of handlebars, smart front lights (inner indicators) - all built by hand back at Pilgrim Motorcycles workshop. Completely rebuilt, with exchanged fluids and gaskets, Pilgrim 125cc Series are a perfect solution for riders looking for their first bike or a smart bike which help them cruise their cities despite the.
