Naish Fly 15mtr. lichtweer kite.

Designed for fun in light to marginal wind conditions. The Naish Fly 2014 goes in virtually no wind and is incredibly fun to ride. Its exceptionally light weight is primarily the result of removing the centre strut. In doing this, the centre section of the canopy performs like a spinnaker and generates incredible power in light wind.

It has amazing low-end power due to its proven two-strut, easy-handling design, which also provides superior turning and control, allowing riders to practice their manoeuvres no matter how light the wind is.

The Fly's new reduced leading edge taper also adds rigidity to the wing tip, moving the axis of rotation closer to the centre of the kite, resulting in sharper turning and a more precise bar.
