Cisco routers 870 series, veelal uit voorraad leverbaar!

Verentis B.V. levert netwerk- en serverapparatuur, waaronder de Cisco 870 series routers.

The Cisco® 870 Series Integrated Services Routers extend the high-performance Cisco Integrated Services Router capabilities of running secure concurrent services, including firewall, VPNs, and WLANs, at broadband speeds to small offices. Easy deployment and centralized management features enable the Cisco 870 Series to be deployed in small office or teleworker sites as part of an enterprise network, by small to medium business customers for secure WAN and WLAN connectivity, or used by service providers to offer business-class broadband and WLAN services.

Cisco 870 Series of integrated services routers are fixed-configuration routers that support multiple types of DSL technologies, broadband cable, and Metro Ethernet connections in small offices (Figures 1 and 2). They provide the performance needed to run concurrent services, including firewall, intrusion prevention, and encryption for VPNs; optional 802.11b/g for WLAN networking; and quality of service (QoS) features for optimizing voice and video applications. In addition, the Cisco Router and Security Device Manager (SDM) Web-based configuration tool simplifies setup and deployment (Figure 3), and centralized management capabilities give network managers visibility and control of the network configurations at the remote site.

Cisco 870 Series integrated services routers offer:

- High-performance broadband access in small offices

- Quality of service (QoS) security

- Firewall, Intrusion Prevention System (IPS)

- Cisco (IPSec) VPNs (Triple Data Encryption Standard [3DES] or Advanced Encryption Standard [AES])

- Stateful inspection system

- Cisco routers 870 series, veelal uit voorraad leverbaar

- Security prevention system

- Intrusion prevention system

- Cisco routers 870 series, veelal uit voorraad leverbaar

-
- Antivirus support through Network Admission Control (NAC) and enforcement of secure access policies
 - 4-port 10/100 managed switch with VLAN support
 - Secure WLAN 802.11b/g option with use of multiple antennas
 - Easy setup, deployment, and remote management capabilities through Web-based tools and Cisco IOS® Software

Cisco 870 Series integrated service routers combine increased network performance with advanced security to allow small office customers to get the most from their broadband connections. With models supporting different broadband technologies such as DSL, cable, and Metro Ethernet, the Cisco 870 Series can be deployed at any small office location. Optional integrated 802.11b/g wireless capabilities provide true business-class WAN and WLAN access in a single solution. With Cisco 870 Series enterprise IT managers and service providers can take advantage of a solution that can be easily set up at the remote site and then be centrally managed to reduce ongoing operational costs.

Meerdere leverbaar, continu voorraad! Levering door geheel Europa mogelijk. Bel voor een prijsopgaaf!
Levering altijd met factuur.

Mocht het product dat u zoekt er onverhoop niet tussen staan, laat het ons dan weten. Wij kunnen uw

artikel naar alle waarschijnlijkheid wel leveren.

Verentis B.V. richt zich op de inkoop en verkoop van (refurbished) hardware van onder meer Cisco, HP en 3Com, het ontwerp en de implementatie van diverse IT-oplossingen en support. Ons wereldwijde netwerk en continu anticiperen op de markt maken het mogelijk om (ook hard to find) onderdelen snel te leveren en om ook in spoedgevallen de best passende oplossing te leveren. Omdat wij zowel nieuwe als refurbished producten leveren, bieden wij voor praktisch ieder budget een passende en complete oplossing. Voor meer informatie kunt u contact met ons.
