Cisco Linksys SR2024 24 poorts Gigabit Switch

The Cisco SR2024 24-Port 10/100/1000 Gigabit Switch provides nonblocking, wire-speed switching for your 10-, 100-, and 1000-Mb network clients. Use this switch to replace your current workgroup hub or switch, and you can upgrade your high-requirement workstations to full Gigabit speeds as necessary, while continuing to service other clients at their current speeds. Or build your network from the ground up, with appropriate link speeds for each user's requirements. Either way, it's perfect for graphics, multimedia, and other applications that have to move large files across the network quickly. And when you need to expand your network even further, the two mini Gigabit Interface Converter (mini-GBIC) ports let you add fiber-optic capability easily and cost-effectively.
