

# LightningEdge Access Concentrator(s)

Locatie **Noord-Holland, Amsterdam**  
<https://www.advertentienx.nl/x-552225-z>

Onze voormalige toepassing:  
 3 stuks LightningEdge310 access concentrators van World Wide Packets.  
 Zijn bij ons altijd in gebruik geweest om gebouwen via glas aan elkaar te knopen.

Omschrijving uit de manual:  
 The World Wide Packets, LE-3xx LightningEdge Access Concentrators provide Ethernet connectivity to buildings and residences that are connected to the provider's fiber infrastructure, delivering high-speed voice, video, and data connectivity. The LE-3xx supports up to 24 subscriber connections via 100 Mbps SFP Ethernet ports (LE-307, LE-317, LE-327) or 10/100BASE-TX Ethernet ports (LE-311/311v). All models of LE-3xx Concentrators provide uplink services using four 1000BASE-X, small form factor pluggable (SFP), single mode fiber Ethernet links. All four Gigabit uplink ports on LE-3xx concentrators can be

---

Access Concentrators are specifically designed to aggregate subscribers, either directly connected using an LE Access Portal or another aggregation device such as another Concentrator. The LE-3xx incorporates advanced QoS capabilities, flexibility through pluggable optics, superior multicast control, manageability, and a small form factor chassis to present the industry's leading fiber-to-thebuilding solution.

The LE-3xx Access Concentrator's primary function is to lower the overall cost of building out a fiber network. The LE-3xx can be connected upstream to an Access Distributor, where services enter the network via direct connections or other network infrastructure such as a metro ring. This allows the network to be built using fewer individual upstream fiber runs and utilizes only short fiber drops to individual subscribers as they sign up for.
