

## revisie nieuwe cadanas aandrijfas tussenas cayenne touareg (325 EUR)

Locatie **Limburg, Maasbree**  
<https://www.advertentiax.nl/x-586905-z>

Te koop van dÃ© enige specialist in Nederland!!! wanneer uw Q7 cayenne of touareg een trilling heeft bij het optrekken en afremmen op de versnellingsbak, meestal rond de 60-80 km/h, dan is vaak het hanglager defect, dat is een kwaal bij deze modellen.

Een nieuwe as bij de dealer zal u een rib uit het lijf zijn, wanneer het VW betreft rond de €900,-ex BTW, en bij de Porsche een slordige €1200,- (voor dezelfde as als bij de VW). Wij kunnen u een 3 goede alternatieven bieden die zich reeds vele malen hebben bewezen, namelijk:

-nieuwe originele as, exact dezelfde als die de dealer u verkoopt, alleen dan zÃ©nder tussenkomst van de dealer, dus vele malen goedkoper. Deze as kost bij ons €525,- met inruil van de oude as.

-initiatie as (productie uit Duitsland, geen goedkope china rommel) dus goede degelijke kwaliteit en alles spiksplinternieuw voor een fractie van de nieuwe prijs bij de dealer! deze as kost € 395,- met inruil oude as.

-revisie cardanas, deze assen zijn gereviseerde origineel geleverde cardanassen, assen zijn voorzien van een nieuw lager en nieuw vet in de homokineten. uiteraard met garantie! prijs voor deze assen is €325,- met inruil van de oude as, alleen mag hier de oude as niet eerder gerepareerd zijn geweest, Ã© gedeeld zijn in het midden, indien dat wÃ©l het geval is word maar €100,- van de € 150,- statiegeld teruggegeven voor de oude as. (statiegeld is niet inbegrepen bij de prijs van € 325,-).

|                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                    |
