Locatie **Noord-Holland, Amsterdam**
<https://www.advertentiex.nl/x-630620-z>

OOK TE KOOP!

Ruilen voor 12 maanden open Pgp inclusief toestel.
 Uniek in Nederland..

Ook zo zat dat uw winkel word leeg gehaald?
 En dit terwijl u (denkt!) een water dicht alarm systeem heeft stickers,tags/buttons/klemmen??

Covers 58-66kHz AM& EM (Meto etc.)All RF frequencies (1.5-13.6 MHz)
 Invisible to most existing anti-jammer-equipped gates.Â The only EAS tester with an additional LED which indicates a properly connected RF antenna(wire) and correctly functioning interior circuitry.In case of a broken RF antenna(wire), the additional LED warns the user that the RF section is out of function.Â R/G LED near the main switch indicates the battery condition.Blue LED indicates an active internal circuit.Â The device can be used like a jammer for testing the anti-jam feature applied on some standard EAS gate systems.Effective range depends on the distance and strength of the gates, but passing through the gates under normal conditions is safe.Â The user has to carry the device on himself while passing through!It is recommended to turn the device on before passing through to test the behaviour of the gates.Â Â Avoid gates which exhibit unpredicted behaviour(that usually happens when the gates are badly adjusted and/or maintained).

Important notes:Â *ALWAYS USE HIGH QUALITY BATTERIES!Â Don't use zinc-carbon, li-ion nor Ni-MH batteries because their energy capacity is insufficient to run the device to maximum capacity (battery life is instantly given away with energy capacity of their 61) batteries such as Energizer, Duracell, etc. and high quality Ni-MH cell are recommended.Â **ALWAYS USE NEW HIGH-QUALITY BATTERIES!Â **ALWAYS USE THE BATTERY CONDITION INDICATOR! (DO NOT USE RED LED)
