

OBD II Alarm module voor Nissan Qashqai tot maart 2009 (50 EUR)

Locatie **Drenthe, Dwingeloo**
<https://www.advertentiax.nl/x-636933-z>

Insteek alarm module voor
 Qashqai, Teana , Livina, X-Trail, SUNNY Murano tot maart 2009.

Ivm verkoop prive auto bied ik de module aan.

Werkte bij mij uitstekend. Deze module werkt alleen op de Nissan Quashqai zonder keyles entree.

Zie hier onder de beschrijving.

For Nissan G-Sensor Car Alarm Anti-theft OBD2
 Descriptions:

This product is applicable for specific cars. It adopts car dedicated processor, compatible with car protocol and perfectly integrated into car CANBUS.

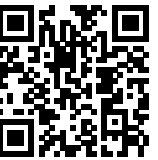

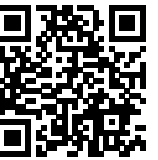

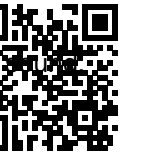

Anti-theft system

Very easy installation.

Just need about 3 seconds

Features / Functions:

1. Ignition function:
After installing the OBDII Alarm to the car, the OBDII port will be blocked, the original OBDII port will not work normally.
2. Car did not lock Indicator:
After the ignition switch is turned off, the left front door has closed 30S, If the car is not fortified, the horn will emit 4 sounds, to indicate that the car is unlocked.
3. Car finder function:
Lock the car with the remote, then at least 6 seconds later push the "Lock" button once, the original horn will emit 4 sounds, and the direction lights will flash once.

4. Sound alert when lock / unlock:

When push the Lock button of OE remote, the OE horn emits one sound to indicate system is lock (armed)

When push the Unlock button of OE remote, the OE horn emits two sounds to indicate system is unlock (disarm)

Note: if you push the "lock" button first, you need to wait at least 6 seconds, then to push the "unlock" button, other wise the OE horn will not emit any sound

5. Alarm Memory:

In case the anti-theft alarm was activated during locked (armed) status, after push the unlock button of remote, the OE horn emits three sounds.

You are suggested to check whether the car is in normal condition or not.

6. Door/s close failure alarm when lock:

In case any door is not closed completely, after push the lock button of remote, the OE horn emits four sounds. (Any door could be 1 door, 2 doors, 3 doors, 4 doors)

7. Trunk close failure alarm when lock:

In case the trunk is not closed completely, when push the lock button of remote, the OE horn emits three sounds.

8. Lamp/s-on alarm when lock:

In case any head lamp (high beam or low beam) is on, when push the lock button of remote, the OE horn emits two sounds.

Note: Door close failure alarm is prior to trunk close failure alarm and Lamps-on alarm, trunk close failure alarm is prior to Lamps-on alarm.

9. Shock alarm function:

In lock status, in case the car is shocked, the OE horn emits 4 sounds and the lights flash 4 times.

Every time the car is shocked, it triggers the sound and light alarm (sound and lights alarm are synchronous).

The anti-theft alarm is generally activated whenever the vehicle is locked and deactivated when it is unlocked

10. Auto-repeat locking (arming)

After Unlock the car with OE remote, if the door or trunk is not open within 30 seconds, the OE horn emits one sound, the system enters into locking (arming) status automatically.

11. Adjustable shock sensitivity:

Default setting is High sensitivity, High---MediumOFF (it is a circling)

1. How to set sensitivity from High to Medium.

Power off the car, within 10 seconds after insert the car key into ignition switch, , turn it from OFF to ON, then from ON to OFF, then from OFF to ON again..., that is OFF-ON-OFF-ON-OFF-ON , then the OE horn emits two sounds. It indicates medium sensitivity is chosen.

12. How to set sensitivity from Medium to OFF

Repeat 1. How to set sensitivity from High to Medium , then the OE horn emits three sounds. It indicates the shock alarm is turned off!

13. How to set sensitivity from OFF to High

Repeat 1. How to set sensitivity from High to Medium , then the OE horn emits one sound.

14. Lights alert when door is open

In unlocked status, when you open any door, all direction lights flash. They stop flashing as soon as all doors are closed. (Any door could be 1 door, 2 doors, 3 doors, 4 doors).

15. Emergency brake unlock

In the even of a sudden fall of driving speed by 40Km/H, for instant, an emergency brake or instantaneous speed down before a likely collision, the system unlock maximum four doors automatically, for an escape. At the same time, the warning lights turn on automatically and flash 16 times.

Key Advantages:

Perfectly integrated into car CANBUS Increased reliability Upgrade and retain OE remote Use car OE horn, keep OE style Built-in G-sensor, increased stability Small and compact Easy installation

Technical Specifications:

Working Voltage DC 7V-24V

Max. working current 40mA

Stand by current 10mA

Working temperature -40-85

Compatible Car Model:

Qashqai, Teana , Livina, X-Trail, SUNNY Murano MARCH 2009

Package Contains:

1 x OBDII
