

## Dell PERC H310 SAS Controller 0HV52W LSI 9211-8i (IT-mode) (60 EUR)

Locatie **Noord-Holland, Amsterdam**  
<https://www.advertentieX.nl/x-817950-z>

Dell PERC H310 SAS controller.

6 Gb/s SAS  
 8 kanaals intern  
 SAS2008 chip  
 PCIe 2.0 x8  
 2x SFF-8087 miniSAS

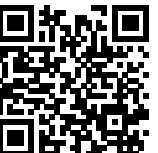

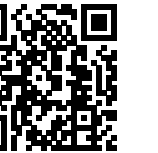

RAID Levels: RAID 0, 1, 5, 10, 50

Inclusief Full Height PCI bracket (zie foto's).  
 Indien gewenst kan ik hem ook leveren met Low Profile Bracket (zie foto's).

Getest en werkt naar behoren op alle 8 kanalen.

Deze specifieke uitvoering van de Dell H310 heeft geen last van het DIMM/SPD SMBus conflict, dus er hoeven geen signalen van de PCI connector afgeplakt te worden om de kaart in standaard PC moederborden te kunnen gebruiken.

De H310 is eigenlijk een OEM uitvoering van de LSI Logic MegaRaid 9240-8i.

|                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                            |

Kan met standaard LSI logic 9211-8i P20-IT firmware geladen worden (MPTFW-20.06.07-00-IT, de meest recente versie). De HBA kan dan gebruikt worden voor JBOD/ZFS toepassingen (not RAID). Ik kan hem

---

met de standaard 9211-8i P20-IT firmware leveren indien gewenst.

Meerdere exemplaren beschikbaar.

Voor bijbehorende SAS kabels zie mijn andere advertenties.

LET OP:

Deze controllers worden erg warm. LSI Logic heeft gespecificeerd dat er een geforceerde koeling van minimaal 200 LFPM vereist is om te zorgen dat de processor niet te heet.
