

UX Designer (Online Internship) (0 EUR)

Locatie **Noord-Holland, Amsterdam**
<https://www.advertentiex.nl/x-822551-z>

Introduction - Online Internship Roles

Front row view of a rapid-growth startup (Web/Marketing/Social Media/ SME / Suppliers/Customers)

We are offering unique, innovative, internships to exceptional applicants interested in seeking top notch business and tech experience in an entrepreneurial startup environment.

You'll be a core member of our team, and administer the pre-planning, production and execution of launch deliverables.

We are looking for a designer who is interested in designing and specifying user interface applications, together with development of CRM, Supplier Management and Business Products.

This is a hybrid role between web technologies and business.

You

- have an eye for clean and artful design, possess good UI UX skills
- can translate high-level requirements into interaction flows, wireframes and artifacts
- can transform them into beautiful, intuitive, and functional user interfaces
- understand and balance the costs of design implementation

You have an understanding of and are competent in several of the following:

User Research: conducting user interviews, interviews, behaviour analysis
Information Architecture: how to organise site content, how search should work, what labels to use on menus
Content: copywriting, how to structure content to be deployed on different devices, microcopy on headings & buttons
Interaction Design: what screens should go where in an app, and how a user flows through them. Also transitions between screens, often inspired by real-world paradigms (page curls, sliding windows etc.)
Visual Design: typography, layout, colour, graphics, visual effects, imagery, texture, mood
Organisation: planning, organising and controlling a UX project
Integration:

HTML, CSS, JavaScript etc principles to implement a visual design in the context of suitable applications and plugins such as Wordpress and AmemberOnline marketing:

Marketing technology like sales and conversion rate, landing pages, email campaigns, social analytics, and all integrated with blockchain.

[illegible]

Produce written reports from analysis and develop new concepts based on feedback and consigns to a higher level. Give written or written confirmation of results.

With notable UX developers and content creators, we explored reframing, in regards, a) the need to effectively communicate with design, b)

user interface to the UI development team, ideally including visualization and graphic design work with developers to communicate specifications, ensure correct

Implement and solve any problems encountered. Conduct usability testing and integrate results into the next iteration of UI design. Interface with clients to collect and

convince, how the user experience will impact the overall product experience. Ideally have some proficiency in Photoshop, Illustrator, and/or a wireframing tool like Balsamiq or OmniGraffle, with experience of working in Design. This isn't a coding role, but we'd expect a familiarity with SQL, HTML, CSS etc. You ideally have understanding of full stack development. You should have problem-diagnosis and creative problem-solving skills. Worked on projects related to application UI UX.

Terms

General Requirements

Ideal

Business analysis and project management.

Experience in business or product development for ecommerce, social media, marketplace, content management, or other modules.

Mandatory

Pioneering mindset you will be one of the few. Excellent English skills, both verbal and written (100% English environment). The highest level of integrity and discretion, and exceptional attention to detail. Ability to handle confidential and sensitive information properly. Excellent multitasking, collaboration and communication skills. Excellent knowledge of MS Office (Windows environment). Ability to enter and thrive in a fast paced work environment. Ability to work under pressure and meet tight deadlines. Hands-on with a positive, can-do attitude.

Location

Intern roles are fully online internships, meaning that you must

be proficient in, and have access to, a home office and a good internet connection and be well versed in collaboration

and communication concepts and technologies. Although you will

be in constant electronic communication with the team, you should be self sufficient and happy to work unsupervised and possibly unaccompanied, for most of the day.

Schedules

You will be assessed by your completed deliverables, not by the

time you spend, so what you get out is what you put in. Part of your challenge will be to apply and calibrate your judgement to maintain an equilibrium.

You will be expected to work on various projects for 24 weeks, 40

hours per week, Monday to Friday. Nevertheless, flexibility is provided and expected, to meet the needs of collaboration and you should be prepared to manage an extremely flexible schedule that may include late nights and weekends.

Benefits

While we offer only limited remuneration for the internship, it offers unrivalled benefits. You will start as a rookie and leave a veteran. Broad business experience real-life, cutting edge, online team collaboration. Creativity, flexibility, variety with tremendous growth potential. Advisors who have extensive business, tech, management and leadership experience. An initiative driven, fast-paced entrepreneurial meritocracy. Feedback, formal assessment and a commercial business certificate. Rare lifetime opportunity to see it all and do it all in a web startup. Get in at the deep end and start swimming!

Reimbursement

As there are no travel or clothing requirements and applicants

are able to use their own equipment, there will be only limited reimbursement and only on a pre-agreed basis.

Assessment & Accreditation

Intern roles will be continually assessed, resulting in an intern evaluation and commercial certification upon completion, but do not qualify for academic accreditation.

Applications

If this is you, then send your CV, with your picture (no older than 3 months) and cover letter, (English) together with any supporting material or links. Shortlisted candidates will initially have an email selection screening followed by phone screening. In line with industry practice, and the extremely valuable commercial assets and intellectual property being accessed, selected candidates will sign a Non Disclosure Agreement (NDA).

Due to the volume of enquiries, we will only reply to candidates who are under consideration.

No communication within 7 days means that you have not been shortlisted for the first or any subsequent stage. This is a standard procedure and a reflection of our specific, nuanced requirements. It should not be seen, in itself, to be a judgement of your knowledge, skills or talent, so we thank you in advance for your application and wish you.
