Functieomschrijving

Civil Engineer

Description

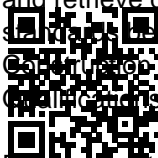

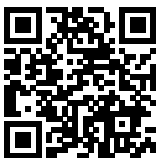

We have an exciting opportunity in our Engineering Solutions Department for a Civil Engineer at our Terneuzen, NLD location. This role is predominately responsible for civil/structural design (i.e., Structural Steel, Concrete Foundations, Piling, Pipe Supports, etc). He / She will supervise designers to develop and assemble contract packages in accordance with the project schedule. The successful candidate will be expected to quickly learn and effectively apply the Dow design tools, work processes, standards, and best practices. The candidate is also expected to drive productivity and performance improvements.

Responsibilities:

Assist with the Scope development during FEL/Project Definition Phase
 Develop Civil Design Packages using SP3D modeling software as well as Microstation.
 Create all required project documentation, including Civil Drawings, Demolition Photo Documents, Civil Job Instructions, etc.
 Provide overall responsibility for Code compliance and Structural Steel connection approval
 Create electronic drawings to scale indicating coordinates, dimensions, material specifications, and other standard information
 Archive and retrieve drawings using archive tools.
 Plot drawings and organize packages according to package schedule before delivery to client.
 Handle all outstanding open items, package preparation, and support of client activities.
 Communicate with client technical staff.

Requirements:

A minimum of 5-10 years civil/structural engineering experience is required on capital/expenditure projects.
 Prior experience in the Chemical, Petrochemical, Oil and Gas, or Energy industry is preferred.
