Windows 10 Home
 A highly improved but ever familiar operating system for home use
 As Microsoft assures us, Windows 10 Home makes things happen! The system builds upon its predecessors through its swift, practical, and extremely elegant new features, and through the unprecedented amount of built-in security features that will keep you at peace.

Multi-tasking
 The enhancements in Snap will not let you snap while multitasking! Make all the apps you need visible at once by dragging them as you wish on your screen. If some space is left, Windows will suggest how to fill the gaps with other apps you have started. In addition, you can manage your work by adding and deleting tasks in Task View. This also enables you to see all your active apps, files, and docs easily in one window.

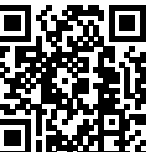

Continuum
 Continuum is the new feature through which Windows is able to detect the type of hardware you are using and choose an appropriate interface for your device. Thus your active tabs will scale smoothly to any display you choose to work with.

Stay edgy with Microsoft Edge
 Windows 10's™ brand new browser Edge will make the web be at your service! With Microsoft Edge you

can write, type, and mark up directly on web pages, and share those with others. The improved address bar will show you links you've visited before. And the new reading view will remove all distractions to let you focus on the content. In addition, Microsoft Edge your browser's™ built-in security features will keep you safe from malware and phishing attacks.

Gamers, listen up!
 Xbox lovers can now experience a more social type of gaming by sharing their achievements online. Game DVR feature enables the user to record and share the epic victories or funny fails with friends on social networks.

We are sending key and instructions how to download install and activate this product on email.
