Dell Intel Pro/1000 Quad-Port Gigabit PCI-Express x4 NIC -
Dell P/N: 0H092P

This Intel NIC is a quad port, copper Gigabit Ethernet (GbE) server adapter designed for multi-core processors and optimized for virtualization. It conserves valuable PCI Express (PCIe) server slots, while adding four ports of Gigabit Ethernet capability. The Intel Gigabit quad port server adapter delivers increased bandwidth for slot-constrained servers and provides high performance, reliability and low power.

Een PCIe 2.0 x4 kaart zou het moeten zijn...

Volgens mij is het Intel Pro/1000 ET series, maar ben er niet helemaal zeker van.

Deze kaart/adapter is een low-profile model
maar met een full-height bracket
(helaas zit het low-profile slot plaatje er niet bij)

Levering betreft alléén de netwerkkaart, er zit verder niets.
