I'm selling my Desktop Work/Gaming station. This thing is my baby and has never let me down although after 1.5 years of being the work horse in my life, i'm leaving the country and it can't come with me :(

If you're looking for a PC that can play all games in 1080p ultra and some even in 4k with Ultra settings this is it. If you're looking for a PC that can render out even the toughest projects, ram preview with no issues and to keep render times to an absolute minimum, this is it.

Gaming (these are just the games i play and with the settings i play at):

- Battlefield V: 90fps - 4k Medium
- Dota 2: 118fps - 4k ultra
- Fortnite: 80fps - 4k high
- Bioshock Infinite: - 100fps - 4k Ultra
- Steep: 90fps - 4k Medium
- Assassin's Creed Origins: 65fps - 4k Medium
- PUBG: 80fps - 4k Medium
