Bedrijfsomschrijving

Nouvall Engineering Services is gespecialiseerd in projectondersteuning voor de (petro)chemische Industrie. Wij leveren hierin expertise op het gebied van Engineering, Project Management, Maintenance, Shutdowns, Construction en Safety.

For one of our clients in the Breda region, we are looking for a Sr. Welding Engineer

Functieomschrijving

Description:

As Welding Specialist you prepare and implement welding, NDE and heat treatment techniques and procedures in compliance with the contractual requirements of our customers, the relevant design and construction codes (ASME, EN, ISO, etc.), as well adherence to the national and international regulations. Utilizing knowledge of production specifications, properties and characteristics of metal and metal alloys, conduct research and development investigations to develop and test new fabrications processes and procedures. Develop and test new or modify current welding methods, techniques and procedures, discover new patterns of welding phenomena, or to correlate and substantiate hypothesis.

You are responsible for the correct implementation and execution of the project, as well as the necessary technical control and the customer documentation. You are responsible and solution oriented to take on requests regarding quality control issues which occur during the construction of objects. You are constantly looking for improvement and development of procedures, welding techniques and welding equipment, therefore you also organize relevant welding training or welding courses. You are authorized to renew welding certificates.

As part of the QA/QC department you indicate actions to, and with your colleagues. You work in close cooperation with departments within our organization (i.e. Production Management, Purchasing and Project Management). You are also the contact for other third parties to conduct laboratory test and

maintain the coordination.

You are also responsible for direct liaison with our customer regarding welding matters. You can provide our customer with substantiated advice if necessary.
You report directly to the Technical Director.

Functie-eisen

Requirements:

Completed course International Welding Engineer (IWE); A minimum of 5 years of international welding experience in the oil and gas and/or offshore industry. Due to the international character of our organization, travelling will be necessary (depending on project). Knowledge of welding metallurgy, welding processes and welding equipment. Knowledge of ASME VIII, Div. 1, Div. 2, ISO, EN, etc. Knowledge of the international regulation such as pressure equipment Directive 14/68/EU, 06/42, EC, etc. Your Dutch and English language skills (speaking and writing) are excellent, as well as your communication skills. You are solution-minded and pro-active towards your colleagues, customers, and suppliers. You are familiar with Microsoft Office software.
