

Project Engineer

Locatie

Noord-Holland, Amsterdam

<https://www.advertentieX.nl/x-954146-z>

Would you like to be responsible for the internal coordination of projects for repair and revision of industrial gas parts? You should definitely read further because this vacancy as The Project Engineer could be your next job. Your main tasks are:

Determine the repairability of gas turbine components according to customer-agreed repair specifications
Lead the repair according to technical specifications at our service centre.

Inspection of gas turbines and components at the customer site and technical consultation with the customer

Carry out cost calculations and job evaluations

Support projects in product development and knowledge transfer

You will also have to ensure proper documentation of executed orders (such as working instructions, production calculations, drawings and other specifications) and solve production problems. In this role you will work together with Production teams, Sales, Quality Control and Project.
