

# Aprilia Tuono 1000R 2005 (3.750 EUR)

Locatie **Friesland, Drachten**  
<https://www.advertentiax.nl/x-954374-z>

Aangeboden mijn tuono  
 Dit is een limited edition, deze werd gemaakt als afsluiter van deze model lijn. In 2006 kwam de nieuwe tuono op de markt.  
 De motor is vanuit de fabriek volgehangen met luxe producten;  
 Carbon voorkap, spatbord v+a, lucht intakes, uitlaatbeugels, bellypan, achterkant en duo afdekkap. De tank is feitelijk, samen met 2 kleine kapjes de enige die niet van Carbon zijn.  
 Er is een fabrieks Akrapovic 2-2 systeem aanwezig. Prachtig geluid en levert ook meer vermogen.  
 Wat is er allemaal gebeurd?  
 -Ducati achterrem pomp voor betere remdruk  
 -Oberon koppelingspomp  
 -setje wave discs van Braking  
 -gear indicator  
 -setje Parro remhendels (imitatie)  
 -led achterlichten  
 -zwarte steps  
 Vering is afgesteld door motorhuis Langezwaag  
 De kuipenset is in 2017 gespoten in een uniek design.  
 Het lijnenspel is gespoten onder een stevige blanke lak laag.  
 De koplamp is zonder barsten, tevens is er een beschermkap bij om de koplamp mooi te houden.  
 Een druppellader, schijfrem slot, kabelslot, duozitje, evenals de paddock standaard komen bij de motor

|                                                                                                                                                                                                                       |                                                                                                                                                                                                                        |                                                                                                                                                                                                                        |                                                                                                                                                                                                                        |                                                                                                                                                                                                                         |                                                                                                                                                                                                                          |                                                                                                                                                                                                                          |                                                                                                                                                                                                                          |                                                                                                                                                                                                                          |                                                                                                                                                                                                                          |
