Algemene info JL Audio W7AE Subwoofer Drivers

There is no compromise when seeking maximum output and superb sound quality. JL Audio's unique polyimide cone's ability to deliver extremely accurate, linear and sublimely smooth bass... all at the same time.

The keys to these performance capabilities lie at the very core of loudspeaker design, where electro-magnetic and mechanical behaviors combine in fantastically complex ways. JL Audio's intense research into these behaviors allows us to optimize the W7 motor and suspension systems to faithfully reproduce every bass detail with unparalleled linearity and accuracy. Eight U.S. Patents have been issued for motor, suspension and assembly technologies used in the W7's. Every W7 subwoofer is built to exacting quality standards in our Miramar, Florida factory and manifests our passionate pursuit of great audio.

Key Technologies JL Audio W7AE Subwoofer Drivers:

- DMA-optimized motor systems = lower distortion & higher output
- Highly linear, FEA-optimized suspension = lower distortion and improved reliability
- W-Cone = low mass with excellent stiffness
- OverRoll Surround = extreme excursion without losing cone area
- Radial-Drilled Pole Piece = improved power handling by venting interior of gap
- Elevated Frame Cooling System = improved power handling by venting coil directly
- Plateau Reinforced Spider Attach (RC) = mechanical reinforcement of spider attachment
- FCAM Assembly System = improved moving parts alignment
- Lead Wire Management System = improved lead wire reliability with no effect on spider
