A very powerful DualSIM phone with quite unique specifications (SM-N9500 model with Snapdragon 835 processor and 128GB memory). The processor is much faster and powerful than Exynos, which is installed in all EU models. You can feel the difference when using 3D graphics in games or other applications.

The phone is in a good condition, 2 years in careful use. It was always used in case and with screen protective film. Though there are some small spots on the laque (see the pictures) due to dust inside of case. It has never be fallen, damaged etc.

Pay attention to the following nuances:

1. There is a small black spot on the screen (see the pictures). It appeared after 1 years, staying in stable size. It doesn't make any problem and is almost invisible in a dark or colourful pictures, movies, games.
2. There is Original UK charger in the box, but along with EU adapter (fast charging). I add also a brand new cable.

Along with the phone I give away: 3 good cases (one is made of natural leather), all are 50EUR worth, a new screen protective film.
